## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-35 are allowed.

The following is an examiner's statement of reasons for allowance: The Applicant's invention is directed to a application-specific intrusion detection method that generates an fabricated response. The Applicant arguments regarding the U.S. Patent 6996843 to Moran reference not having application-specific feature for network policy is persuasive. And further, the Applicant's argument regarding the designating of received requests for network communication services as authorized/unauthorized based on application-specific policy is persuasive.
